

## **Environmental Sustainability Junior Specialist**

**“I want to make an impact locally and have an influence globally”**

### **Nestlé Purina Petcare Europe, Noisiel, FRANCE    Internship or Apprenticeship**

NPP EMENA has created in 2014 its European Center for Operations Excellence, which has brought together experts from several countries in Product Development, Engineering, Quality Management, Procurement and Project Management.

At Nestlé Purina Petcare, we are passionately committed to enriching the lives of pets and the people who love them. Our dedication to pets, and their owners, directs everything we do, every day, everywhere. Today, Nestlé Purina Petcare is one of the world's leading pet care companies. We offer an attractive and dynamic work environment with a high focus on developing people.

In order to support the implementation of environmental improvements in our 14 factories, enhancing continuous improvement through cross-fertilization, and to identify improvement opportunities through tool usage and implementation of governance and routines, we are looking for an Intern or

#### **Key responsibilities**

- Analyze all site energy, water, CO<sub>2</sub>, waste performance and provide monthly/quarterly reports for network and managers. Engage with factories to address deviations.
- Support all sites in completing and updating Energy/Water/Waste management tools (mapping, pareto, benchmark, DYI...). Study and analyse the information obtained through these tools and agree with sites on next steps.
- Support factories in doing benchmark and identifying areas for improvement of environmental parameters.
- Propose further development of the tools to better adapt them for its purpose, or propose new initiatives to facilitate identifying opportunities.
- Manage compliance audits: plan, collect reports and follow-up factory action plans to close potential gaps

Apprentice to join our Environmental Sustainability team.

#### **Education and experience**

- Engineer or MSc Engineering ideally with specialization in Energy management or Environment
- Good analytical skills and detailed oriented: ability to provide meaningful reports of energy, water consumption, and draw conclusions. Ability to go into details. Very good level at using Office & Excel in particular
- Autonomous
- Fluent English
- Result focus, willing to challenge factories
- Good communication skills
- Team player
